Meets Specifications

Congratulations on successfully completing this project! 🎉
You did a great job here! The answers were concise and accurate!
Keep making progress and all the best for your future projects!

Examine Pre-Existing BABS Visualizations

> At least two questions are listed that can be answered with data.

> A thoughtful and thorough examination of at least two visualizations are provided.
>
> At least one question from Q1 is attempted to be answered, or a logical explanation is provided as to why the question cannot be answered with the visualizations provided.

Conduct Your Own Analysis

> Data wrangling was performed correctly, resulting in the code being correctly printed & correct count message displayed.

> The correct trip duration and number of trips are listed.
>
> That's absolutely correct!

> Two visualizations are created and insights clearly and coherently described.

> One scenario where techniques of data science could be used was described, along with a potential application within that field.
